
Personal hobbies:

I like listening to music very much, in my spare time, i have taken many times to music. Whatsmore, i am keen on Jazz, i have learnt Jazz for two years, but almost a green hands. Sometimes, i read something about daily news, i want to know what is happening around the world.

Experience:

2012.04–2012.05 i was trained at WuHan BeyondSoft of software test

2013.04–2013.05 i participated in the course of intelligent robot, it was an honor for me that Dr G Venkatesh was my teacher during these days.

Venkatesh is a researcher and developer in the field of robotic in India, with 32 years of experience, who has been teaching across India. According to Dr G Venkatesh robotics is a very boring subject as of now in colleges as it stresses on higher mathematics and very little hands-on training.

During these days, i was a member who came from PP Team, i enjoyed the days with Dr G Venkatesh. Whatsmore, our team had finished the underwater robot. Although, the robot we made wasn't good enough and had many problems remained to be solved, we all felt proud of ourselves.

Self-assessment:

I am enthusiastic, sociable, cheerful and with perfect operational ability. And I have good communication skills, adaptable, quick, active,

flexible, love innovation! I am very focused on improving myself, adapt to different needs. In school, I often participate in various activities, and served as student leaders, through these exercises, I already have a certain amount of social skills, and have excellent organizational and coordination skills.
