

Name	Xia, Xiu	Sex	female	
Birthday	1990.02.05	Birthplace	YuChengCity, ShanDong Province	
Nationality	China	Tel	15898128617	
First Degree	Bachelor of Electronic and Information Engineering			
Reading Degree	Master's degree in Computer Science and Engineering			
Reading College	Dalian Nationalities University			
Email	1056800280@qq.com	Present Address	Dalian City, Liaoning Province, China	
self intro	<p>1) Undergraduate period, I studied electronics and information engineering, in-depth study of digital image processing, signals and systems, communication theory, and other professional courses, and a good grasp of the basic theory of general computer applications for digital image analysis and processing methods. And grasp the basic concepts related to image processing and image analysis, basic theory, basic typical methods, mastered some programming skills to use computer programming simple image transformation, image enhancement. To graduate study laid a foundation.</p> <p>2) During the first year graduate student, I learned the knowledge of image retrieval, read a lot of content-based image retrieval based on the literature, the image retrieval based on color features were studied on a common data set Corel1k realize image retrieval system. The system retrieves results as shown in Figure1.</p>			

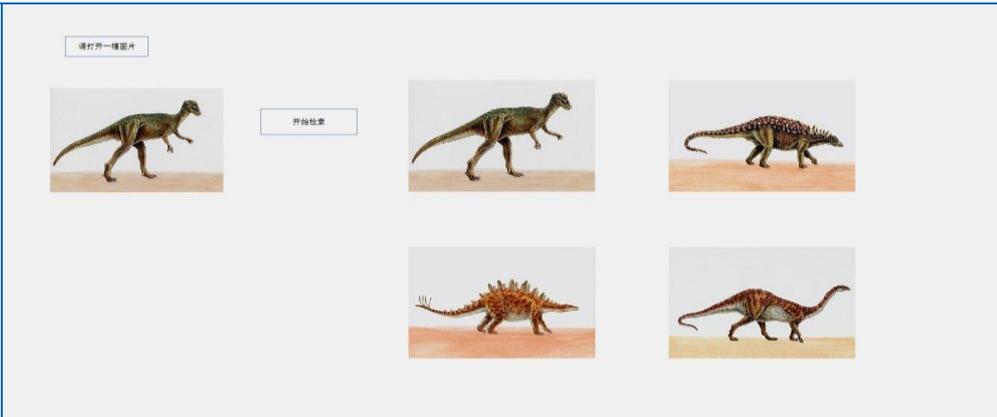

Figure1 CBIR system runs renderings

- 3) At the end of 2013, I studied the image annotation relevant learning content, research to achieve a classic image annotation model --- Cross-media correlation model (Cross-Media Retrieval Model, CMRM). I first used the image segmentation technique to generate a local area of each image, the characteristics of these image regions through clustering, with the formation of visual keyword semantic features, and then study the relationship between the visual and semantic keyword keyword. Specific cross-media correlation model (CMRM) is true, on a common data set Corel5k completed. The specific labeling effect shown in Figure 2:

hobbies	<p>1) I like sports, such as volleyball and running, I had participated in college cross country and 3,000 m run schools.</p> <p>2) Reading is my favorite, two-thirds of my spare time is spent on reading.</p>
work experience	<p>1) After graduating from college, I made an assessment of the company to assess assistant, the job has changed me a lot, so I am more careful and calm, even become a good listener and opinionated learn.</p> <p>2) I once had a run of 30 students remedial classes, I was their teacher, not only responsible for their math, physics, English, also taking into account their lives teacher. This wonderful experience made me more understanding of what is the responsibility, how to communicate with children and how to try to change the traditional mode of education in rural China. So that more rural children could have the opportunity to understand the outside world, exposure to new things.</p>
wish	<p>1) I want to be able to have a more in-depth study in image recognition and retrieval.</p> <p>2) I Want to be able to do whatever things for the development of China's national image and inheritance.</p> <p>3) In my lifetime, I can have the opportunity to go to the village to support education.</p>
